

Global Head of Digital Transformation and AI Holcim

Lily Wong

Lily Wong is Global Head of Digital Transformation & AI at Holcim, one of the world's leading sustainable building solutions companies. She is responsible for shaping and accelerating Holcim's global digital and AI strategy, helping the organization unlock business value through technology, data, and artificial intelligence across commercial, logistics, operations, and corporate functions. With over 20 years of international experience spanning consulting, life sciences, consumer health, and industrial sectors, Lily has built a reputation for connecting business strategy with technology execution. Her career has included leadership roles at Holcim, Bayer, IBM, and Accenture, where she helped global organizations navigate complex...
