

Expert in Quantum-Driven Neuromorphic Computing and Scalable Use-Case Solutions

Daniela Herrmann

Daniela Herrmann is Co-Founder and CEO of Dynex and serves as the company's Head of Global Leadership. She is widely regarded as one of the leading international voices in quantum computing, neuromorphic computing, and scalable high-performance architectures. She is also Mission Leader of Dynex Moonshots, the Family Office of Dynex and the investment, strategic, and ethical steward of the Dynex Ecosystem. Dynex Moonshots is investing in visionary companies and institutions, elevating their technological status quo with quantum powered solutions and Dynex's proprietary QaaS technology, enabling next level competition with pioneering solutions at industrial scale which will shape the future and...
