

Expert in Cyber Risks, AI Risks & Digital Governance

Simon Thomas Dejung

As the founder of CyQrd AG, Simon Thomas Dejung helps companies quantify cyber and AI risks and translate them into informed management decisions. His approach: expressing risks in financial terms rather than hiding them behind abstract scores, heat maps, and traffic-light indicators. This makes it clear which investments are worthwhile, which measures should be prioritized, and which risks should be consciously accepted or transferred. “Should we invest two million in cybersecurity and AI governance—or risk a loss of 200 million?” Simon Thomas Dejung’s Presentation Topics Cyber Risk & Investment “The Two-Million-or-200-Million Question” How to reliably quantify AI and cyber risks…
