

Worldwide Leading Expert in Astrophysic

Paul Charbonneau

Paul Charbonneau is Professor at the Physics Department of Université de Montréal, Canada, where he leads the research group in Solar Physics. He is also an affiliate scientist at the High Altitude Observatory, the Solar-Terrestrial division of the National Center for Atmospheric Research in Boulder, Colorado, U.S.A. Trained in astrophysics, for the past twenty years his research has focused the physical mechanisms underlying solar activity, and its impacts on Earth's atmosphere and space environment. TALK TOPICS: What is space weather and why you should care Solar-Terrestrial Interactions: an historical perspective Solar Activity and Climate Change From 1991 to 2002 Paul...
