

Futurist, Expert at Green Cities, new Technology & Mobility of the Future.

Greg Lindsay

Greg Lindsay is a captivating keynote speaker and worldwide known for his profound insights into urban innovation, technology, and the future of cities. As a journalist, urban planner, and futurist, he explores how new technologies—from artificial intelligence to autonomous mobility—are transforming the way people live, work, and get around in urban environments. Greg Lindsay is a two-time Jeopardy! champion (and the only person to remain undefeated against IBM's Watson). His talks often focus on the intersection of infrastructure, digital systems, and human behavior, offering audiences a forward-looking perspective grounded in real-world examples. Lindsay's typical keynote topics include smart cities, climate…
