

Expert on the Future of the Healthcare System, Medicine & Life Sciences

Prof. Dr. med. Harald Schmidt

Professor Harald Schmidt is a doctor, pharmacist, scientist and one of the leading visionaries for the future of medicine, systems medicine and healthcare innovation in Europe. Harald Schmidt discusses why our current healthcare system is reaching its structural limits — and how precision medicine, artificial intelligence and cause-based disease models will fundamentally transform medicine, the pharmaceutical industry and healthcare systems. As an internationally renowned doctor, pharmacist and scientist with experience in Germany, the USA, Australia and the Netherlands, he combines scientific excellence with strategic relevance for business, politics and healthcare systems. As the author of 'The End of Medicine as...
