

ESA - Space Scientist, Astrobiologist, Lecturer, Inventor, Explorer, former NASA employee

Dr. Florian Kehl

Dr. Florian Kehl is a space scientist at the University of Zurich and a Lecturer at the Lucerne University of Applied Sciences. He has previously worked at NASA's Jet Propulsion Laboratory (JPL) in California for nearly seven years and now continues to work with JPL and the European Space Agency ESA. Florian Kehl's research focuses on inventing, designing, and developing fully automated astrobiology instruments for the search for extraterrestrial life and for potential resources on future planetary missions to the Moon, Mars, and the icy moons of Jupiter and Saturn. What can business learn from space research? Robotics – digitalization...
