

Adventurer, Entrepreneur & Three-times Guinness World Record holder

Lukas Haitzmann

Lukas Haitzmann is the Guinness World record holder as the youngest person to row across any ocean solo and unassisted. At just 18 years old, Lukas set off on the epic adventure to row 3,000 miles from Europe to America. For 59 days 'home' was a 7-meter-long rowing boat amongst 30-40ft waves, where most of the time, the closest people to him were astronauts on the International Space Station. His story is not just about breaking a Guinness World Record at 18 years old; it's about shattering the limits of what's possible. Lukas Haitzmann lecture topics Lukas Haitzmann's story is full...
