

Social scientist, Bestselling author & Expert on AI & Ethics, Business & Environment

Dr. Léa Steinacker

Léa Steinacker, PhD, is a social scientist, bestselling author, board member, and award-winning entrepreneur focused on how technology interacts with people, practices, and the planet. Her 2024 book on artificial intelligence, co-written with Prof. Dr. Miriam Meckel became an instant national bestseller. For about a decade, she has researched the widespread impact of emerging technologies like AI, with publications on a range of topics like automated facial recognition, synthetic voice generation, quantum computing, as well as my original framework of Code Capital. She has worked intensively on the question of what opportunities and risks AI entails and how it can be developed, applied and managed in the best possible way. With her...
